

Mileta a. s. is proud to present a new offer of its well known pronto programs. Together with our Italian designers we took in account the requirements of our customers and added the most desired items into our programs.

We offer a wide range of new fabrics (entirely new items or enhanced existing items) in addition to our current types of goods, designs as well as color varieties. We have come up with a very creative and a well-arranged collection so the customers can easily choose what they like.
